

PHAM DO NHAT MINH

Agentic Software Engineer & Experienced Consultant

phamdonhatminh@pm.me | +84 906 659 850 | phamdonhatminh.vercel.app | TP. Hồ Chí Minh

SUMMARY

A curious, adaptable engineer who keeps learning across technologies and domains and picks up new stacks quickly. Spots repetitive work and redundancy, then builds tools and pipelines that remove them, so the team can focus on what matters. Committed to every estimate, delivering on time and at the agreed quality. Combines 5+ years of Java full-stack development with agentic AI engineering: multi-agent pipelines that plan, build and self-validate software.

EXPERIENCE

Data Hub · *Full-Stack Developer*

SEP 2025 – PRESENT

AMARIS CONSULTING VIETNAM · CONSUMER FINANCE CLIENT

- Designed and ran an autonomous agentic development pipeline on an internal AI harness: it turns requirement documents into plans, then builds, validates, reviews, reports and opens pull requests for human review.
- Built a conductor framework running 10+ agents in parallel, routing each task to the right model and effort level; scaled to multiple lanes running 24/7.
- Built a custom high-throughput ETL with the pipeline, streaming 10+ billion records concurrently and cutting a months-long load to about 5 hours.
- Built ETL pipelines (Apache Airflow, Python, Spark) unifying several in-house sources, processing millions of records a day.
- Designed the backend as a hybrid of microservices and a modular monolith; rebuilt the review portal from Angular to Next.js.
- Since go-live in Oct 2025: 4+ major phases, about two features a month and several tickets a day.

Java · Spring Boot · Spring Cloud Gateway · Spring Security · Airflow · Python · Spark · Next.js · TypeScript · PostgreSQL · AWS S3

Procurement Docs Platform · *Java Developer*

JUL – AUG 2025

AMARIS CONSULTING VIETNAM · CONSUMER FINANCE CLIENT

- Built business processes on a platform replacing old document tools: creating, reviewing, approving, signing off and versioning documents.
- Set up versioned approval workflows on the Flowable engine; built Angular staff-portal screens.
- Worked directly with business users on requirements; helped deploy to AWS ECS and took the project into UAT.

Java 17 · Spring Boot · Spring Cloud · Flowable · Angular · PostgreSQL · AWS ECS · RBAC

SKILLS

AGENTIC AI

Multi-agent orchestration, autonomous dev pipelines, prompting strategies; Claude.ai, Claude Code, Pi, Cursor

JAVA

Java 25, Spring Framework, Spring Boot, Maven

JS / TS

TypeScript, JavaScript, Node.js, Bun

WEB & MOBILE

React, Next.js, Angular, Vue.js, Flutter

DATA

PostgreSQL, Oracle; SQL, T-SQL, PL/SQL

CLOUD & DEVOPS

GCP, Firebase, Docker, microservices, CI/CD, Git

LOW-CODE

Mendix

TALKS

CLAUDE, BEYOND THE CODE

Amaris workshop for non-technical roles

HOW VIRTUAL MACHINES WORK

DXC · 100 in the room, 100+ online

EXPERIENCE · CONTINUED

FPT Software · *Senior Java Developer*

APR 2024 – JUN 2025

TRANSPORTATION · ELECTRONIC TOLL COLLECTION

- Led development, ran code reviews and mentored junior developers.
- Worked with clients on requirements and technical demos; coordinated onshore and offshore teams.
- Upgraded end-user applications with CSP, SRI, CORS, proxy filters, captcha, JWT and activity tracking; set best practices for low-code security.
- Production support, defect fixes, change requests and seasonal business changes.

Mendix · Java · JavaEE · Spring Boot · Hibernate · PL/SQL · Oracle · jQuery · Bootstrap · Jira

DXC Technology · *Java Developer*

JAN 2021 – MAR 2024

MESSAGING & FILE TRANSFER · NATIONAL SOCIAL WELFARE SYSTEM

- Worked with global onshore and offshore teams across the full lifecycle.
- Built prototypes and technical solutions for client approval; managed design, presentation, feedback and deployment.
- Modernised administrative modules for security and user experience; delivered social-welfare transformation work.
- Onboarded and guided junior colleagues; shared technical research with the team.

Java · JavaEE · Spring Boot · Hibernate · Vue.js · jQuery · Oracle · Selenium · Jest · Jira

PERSONAL PROJECTS

Agentville · *open source*

A Claude Code plugin packing his own skill suite (voice, relay, dispatch, orchestrate, skill-smith) as building blocks for orchestrating agents.

Claude Code · multi-agent orchestration · skills

phamdonhatminh.vercel.app/agentville

JustClass

Backend developer. REST APIs for classroom management.

Spring Boot · GCP · AWS · Flutter

Flaguru

Logic and backend. Android quiz game with real-time scoring.

Flutter · Dart · SQLite · Firebase

Reminder

Full stack. A to-do list application.

.NET 5.0 · EF Core · React

Electronix

Full stack. E-commerce on an MVC architecture.

.NET Core · SQL Server · MVC

EDUCATION

BSC SOFTWARE ENGINEERING

Hoa Sen University, Ho Chi Minh City · 2017 – 2021 · GPA 3.63/4.0

HIGH SCHOOL

University of Education High School, Ho Chi Minh City · 2014 – 2017

CERTIFICATES

AI FLUENCY

Framework & Foundations · Anthropic · 2026

FE

Fundamental IT Engineer

LANGUAGES

ENGLISH

TOEIC 915 · IELTS 6.5

VIETNAMESE

Native

WORKING PRINCIPLES

I · LEVERAGE

Spot the mundane work, then automate, delegate or build a tool for it.

II · HABIT

Consistency beats motivation.

III · DELIVERY

Ship, validate, adapt.
